

THE OPPORTUNITY

Hundreds of billions of dollars of local micro-services move through Craigslist, Facebook groups, and cash every year — with zero infrastructure for trust, payment, or proof. GUBER is the trust layer: **verified identity on both sides, money on-platform via Stripe Connect**, and **structured proof of work with GPS-locked photos and checklists**. Live on web and native iOS.

WHAT'S ALREADY SHIPPED

- 50+ user-facing pages on web + Capacitor iOS app
- 50+ database tables: jobs, payments, money ledger, disputes, businesses, sponsors, observations
- Two Stripe accounts (subscriptions + Connect) with split webhooks
- Push notifications: VAPID web-push + APNs direct
- Admin panel, dispute resolution, soft-delete + retention

ELEVEN LIVE REVENUE STREAMS

- Job platform fee 20% + 3.2% processing
- Trust Box subscription \$4.99/mo
- Business verification \$49 + Scout Plan \$99/mo + add-on unlocks
- Marketplace boosts (7-day featured)
- Cash Drop brand sponsorships
- Observation marketplace (20% take)
- Direct Offers via Stripe Connect application_fee

COST STORY

~\$0 PER DAY IDLE

Re-architected to true serverless autoscale — down from ~\$50/day. Infrastructure now scales linearly with revenue, not calendar time.

DEFENSIBILITY

Verified-identity + proof-of-work dataset that compounds per user. None of the incumbents (Craigslist, TaskRabbit, Uber) collect this. Combined B2B side (Scout Plan + Observations) gives a second revenue engine no peer-to-peer competitor has.

NETWORK EFFECT

Every new verified helper makes the marketplace more useful for posters, more attractive to businesses, and more valuable to data buyers. Cash Drops are sponsor-funded acquisition events.

MONETIZATION AT A GLANCE

THE ASK

Raising \$[] as equity OR a structured profit-share against platform-fee revenue. Capital deploys to paid acquisition in anchor metros, B2B sales hires for Scout Plan + Cash Drop sponsorships, and App Store launch polish. **Product is shipped — capital is growth, not engineering.**
