

GUBER

Trust-enforced local visibility network

The local services marketplace built around **verified identity, on-platform money, and structured proof of work**. Live on web and iOS. Multi-sided revenue. Idle infrastructure cost ~**\$0/day**.

Local help is broken.

For the person who needs help

- Craigslist & Facebook groups: anonymous strangers, no recourse, payment off-platform.
- TaskRabbit / Handy: rigid categories, opaque pricing, limited geography.
- Phone-a-friend: unreliable, awkward, no proof anything actually got done.

For the person who wants to earn

- Gig platforms take 25–40% and dictate the work.
- No way to prove a clean track record across platforms.
- Cash work has no receipts, no protection, no future.

The result: trillions of dollars of micro-services move through informal channels every year with zero infrastructure for trust, payment, or proof.

Guber is the trust layer.

ID

Verified identity, both sides

Mandatory ID + selfie verification for posters and helpers. No anonymous accounts.

\$

Money on-platform

Stripe Connect for every dollar. Escrow on lock-in, payout on confirmation. Fully traceable money ledger.

Structured proof of work

GPS-locked photos, video, dynamic checklists. Every job ends with verifiable evidence.

The result: **a local marketplace where strangers can transact safely** — because identity, money, and proof are all enforced by the platform, not the user.

This is shipped software.

Not a deck. Not a prototype. **50+ live product surfaces** on web + native iOS today.

Jobs Marketplace

Guided builder, V&I smart forms, time-based pricing, barter, milestones, GPS proof, auto-pay-increase.

Direct Offers

Real-time worker→hirer offers via Stripe Connect with structured counters and 60-min expiry.

Cash Drops

Geo-targeted gamified rewards. Brands sponsor. Users hunt. Platform takes share.

Trust Box (AI or Not)

\$4.99/mo AI-content detection + unlimited text verification subscription.

Business Scout Plan

\$99/mo recurring B2B plan with 20 talent unlocks/mo + add-on packs.

Observation Marketplace

Workers submit real-world observations with GPS/photo. Businesses buy. 20% platform cut.

V&I Verification

Verify-and-Inspect jobs for vehicles, properties, marketplace listings, salvage.

GUBER Resume

Auto-tracked work record + AI-extracted credential cards (CPR, food handler, trade licenses).

How GUBER makes money.

Eleven distinct revenue streams. All wired to Stripe.

STREAM	WHO PAYS	PRICE	STATUS
Job platform fee	Job poster (taken from helper share)	20%	Live
Job processing fee	Job poster (added on top)	3.2%	Live
Worker cashout — early	Helper	2%	Flag-gated
Worker cashout — instant	Helper	5%	Flag-gated
Trust Box subscription	End user	\$4.99 / mo	Live
Day-1 OG tier	Helper / supporter	One-time	Live
Business verification	Business	\$49 one-time	Live
Business Scout Plan	Business	\$99 / mo	Live
Extra unlock packs	Business	Per-pack	Live
Marketplace boost (7-day featured)	Seller	Per-listing	Live
Cash Drop sponsorships	Brand sponsor	Sponsor + platform share	Live
Observation marketplace	Business buyer (helper gets 80%)	20% platform fee	Live
Direct Offers (Stripe Connect)	Hirer (gross-up math)	Application fee	Live
Sponsored visibility / content licensing	Brand sponsor	Per-impression / pack	Emerging

Five sides. One platform.

Helpers

Earn on local jobs, observations, Cash Drops, and Direct Offers. Build a portable, verified resume.

Job earnings

Observation income

Trust Box

Posters

Anyone needing local help. Pay only when a verified helper locks in. 3.2% processing.

Pay-on-lockin

Auto-pay increase

Businesses

Scout verified talent, post bulk jobs, buy observations, sponsor Cash Drops. \$99/mo recurring.

Scout Plan

Bulk post

Talent unlocks

Brand Sponsors

Run gamified, geo-targeted Cash Drops. Reach local users where they already are.

Cash Drop sponsor

Featured boost

Data Buyers

License real-world observations submitted by verified helpers. Vehicle condition, property checks, marketplace authenticity.

Observation API

V&I reports

Network effect

Every new verified helper makes the marketplace more useful for posters AND more attractive to businesses AND more valuable to data buyers.

Infrastructure already in the ground.

- **50+ live database tables** — jobs, payments, money ledger, disputes, business accounts, sponsors, observations, credentials.
- **50+ user-facing pages** across web + native iOS (Capacitor).
- **Two Stripe accounts** wired for split monetization (subscriptions vs Connect payouts) with separate webhooks.
- Push notifications: **VAPID web-push + APNs direct delivery** for native iOS.
- OAuth: Google web + native. Sign in with Apple + Apple Pay queued for the next App Store build.
- Admin panel with role-based access for users, jobs, catalog, disputes, proof templates.

Through Stripe

Operating cost $\approx$ \$0/day idle.

In April 2026 we re-architected the production deployment from always-warm to **true serverless autoscale**:

- Eliminated all in-process timers and background jobs.
- Moved every periodic sweep behind a single secured external cron endpoint.
- Replaced the always-warm pinger with a free 2-minute scheduled GET.

The platform now scales to zero between requests — we pay only when users actually use it.

~\$50

PER DAY · BEFORE

~\$0

PER DAY · IDLE NOW

~99% reduction

Investor takeaway: **unit economics work from user #1**. Infrastructure scales linearly with revenue, not with calendar time.

The market is enormous and informal.

U.S. local services

Roughly **\$600B+/yr** in home services, gig labor, and on-demand help. Most of it is still cash, Craigslist, or word-of-mouth.

Source ranges vary by report; verify before each meeting.

Verified-data B2B

Insurance, lending, marketplaces, and OEMs spend **billions** on third-party physical inspection — a market GUBER can address with V&I + Observations.

Local advertising

U.S. local digital ad spend exceeds **\$170B/yr**. Cash Drops give brands a measurable, gamified, geo-targeted alternative to display ads.

GUBER doesn't need to win all of any of these markets to be a meaningful business — **capturing a fraction of one of them returns the round.**

Why we win.

	CRAIGSLIST / FB GROUPS	TASKRABBIT / HANDY	UBER / DOORDASH	GUBER
Verified identity (both sides)	—	Workers only	Workers only	✓ Both
Money on-platform	—	✓	✓	✓
Structured proof of work	—	—	Receipt only	✓ GPS + photo + checklist
Open category set	✓ but unsafe	Limited	Single vertical	✓ Open + verified
B2B side (talent + data)	—	—	—	✓ Scout Plan + Observations
Brand-sponsored gamification	—	—	—	✓ Cash Drops
Take rate	0%	~25–30%	~25–40%	~20% + 3.2%

Defensibility is the **verified-identity + proof-of-work data** we accumulate per user — none of which the incumbents collect.

How we grow.

Demand-side levers

- **Cash Drops** drive viral local downloads — every drop is a free acquisition event funded by the brand sponsor.
- **Day-1 OG** tier creates evangelists. Lower fees + retention perks in exchange for early adoption.
- **Performance Shares** referral system: referrer gets a share of GUBER's platform fee on referred-user jobs for 30 days. Pure cash, no credits.
- **SEO**: structured job pages indexed by Google with clean URLs and an /jobs sitemap.

Supply-side levers

- **Verified-helper directory** grows with every job — credentials, ratings, proof history compound.
- **B2B Scout Plan** drags businesses (and their bulk job volume) onto the platform. Recurring \$99/mo.
- **Observation Marketplace** turns passive walking-around into income — a unique on-ramp competitors can't match.
- **Native iOS app** in App Store + Sign in with Apple + Apple Pay (queued) maximize trust signals on mobile.

What's next, in order.

Now (0–30 days)

- Sign in with Apple + Apple Pay for App Store submission.
- Cloud photo storage migration to Cloudflare R2.
- Launch performance hardening for first-paint.

Next (30–90 days)

- Scale paid acquisition in 2–3 anchor metros.
- Activate Cash Drop sponsorship sales pipeline.
- B2B sales: onboard 25 paying Scout Plan accounts.

Then (90–180 days)

- Observation Marketplace API for insurance & marketplace partners.
- Sponsored-visibility ad product.
- Android store launch.

Appendix · What's already built.

Every product surface below is shipped code, in production today. Reviewable on request.

Jobs Marketplace

Guided job builder with effort + helpers + price suggestions, V&I smart forms, time-based pricing, barter listings, milestone tracking, GPS-locked proof engine, auto-pay-increase.

Direct Offers

Worker→hirer real-time offers via Stripe Connect with structured counters, 60-min expiry, privacy-before-acceptance.

Cash Drops

Geo-targeted gamified rewards with brand-sponsor economics. VAPID + APNs push to nearby + OG users.

Trust Box (AI or Not)

\$4.99/mo subscription. AI-content detection, unlimited text verification, badge.

Business Scout Plan

\$49 verification + \$99/mo recurring with 20 talent unlocks, plus add-on unlock packs and bulk job posting.

Observation Marketplace

Workers submit GPS+photo observations; businesses purchase; 80/20 helper-platform split.

V&I Verification

Verify-and-Inspect jobs across vehicles, properties, marketplace listings, salvage. Multi-layer dropdowns.

GUBER Resume

Auto-tracked work record + AI-extracted credential cards (CPR, food handler, trade licenses) with admin approval.

Money Ledger & Disputes

Full payment tracking (guber_payments, money_ledger, guber_disputes), structured 8-issue taxonomy, evidence uploads, admin resolution workflow.

Marketplace + Boost

Item listings (Buy/Sell, Rent, Free) with paid 7-day featured boost upsell.

Capacitor iOS app

Native iOS build (com.guber.app), APNs push, native Google OAuth, store-build gating for Google Play compliance.

Admin Panel

Role-based access for managing users, jobs, catalog, disputes, proof templates, platform settings.

The ask.

We're raising \$[___] in exchange for either equity or a structured profit-share against platform-fee revenue.

Use of capital

- Paid acquisition in anchor metros (~__%)
- B2B sales hires for Scout Plan + sponsorships (~__%)
- Apple App Store + Android launch polish (~__%)
- 12 months of runway at sub-\$5/day infrastructure cost

Why now

- Product is shipped — capital goes straight to growth, not engineering.
- Unit economics already work at scale-to-zero infra cost.
- Multiple revenue streams hedge against any one not landing.
- App Store presence imminent — first-mover trust signal in a still-informal market.
