

GUBER

America's **Trust**
Infrastructure Layer.

THE PROBLEM

Trust is breaking —
online and offline.

Across every category of everyday transaction, the cost of **not knowing who you're dealing with** is rising.

AI-generated fraud

Synthetic photos, fake sellers, and ghost listings now infect every major buy/sell platform.

Unsafe local transactions

THE SOLUTION

Strangers meeting strangers with no shared identity layer, no shared ledger, no shared proof.

GUBER is the Human API for Truth.

A nationwide network connecting people who need **help, work, or verification** with real people who can deliver real-world action.

ID

Verified identity — both sides

Mandatory ID + selfie. No anonymous accounts.

MISSION Sex-offender screening at onboarding.

**Built for everyday
people.**

On-platform payments

An equal-opportunity platform where access to work, income, and trust does not depend on who you know.

Opportunity, not gatekeeping

Anyone with verified ID and willingness to show up can earn. No résumé bias, no referral wall,

no opaque algorithm picking winners.

Structured proof of work

Proof beats pedigree

Reputation is built from GPS-verified, timestamped jobs — not follower counts or paid badges. Trust is earned through action.

WHY NOW

The window is open.

The conditions that make GUBER necessary **did not exist five years ago.**

The crisis is compounding

- **AI-generated fraud** floods every consumer platform.

Reputation is portable

- **Marketplace scams** rise at every price tier.
Every completed job and on-time payout builds
- **Remote buying** happens sight-unseen at scale.
structured, portable record the user owns across categories, cities, and time.
- **Gig sprawl** leaves millions with no portable trust record.

PRODUCT

One operating system.
Infrastructure for people, not
just enterprises.
Three connected layers.

Live in production today on web and Android. iOS App Store launch in progress.

LAYER 01 · CORE MARKETPLACE

The productive engine.

The infrastructure is finally cheap

- Smartphone GPS + on-device ML make a national verification network **economically**

Work & Hire

LIVE

possible for the first time.

Verify & Inspect

LIVE

GPS Proof Engine

LIVE

- Stripe Connect safely moves money between millions of unrelated parties.

PRODUCT - SECOND REVENUE RAIL

- The same AI wave that **created** the crisis makes **business activation** **infrastructure.**

The category does not have a category leader yet.

GUBER Content Studio — an AI media engine wired into every verified account. Businesses generate ads, creators ship content, and digital revenue is layered on top of marketplace activity — **all without ever leaving the platform.**

What it does

- Cinematic motion clips from a single reference photo (King Motion Control · 80 cr).

- Mirror-motion videos for short-form social — 5s and 10s (Wan Motion · 30 / 60 cr).

- Business commercials generated in-app for small businesses.

- Brand music via MiniMax (5 cr).

- How it works — vertical snap-scroll of curated generations that pulls requests from a consumer/business network.
- Request — anyone (consumer/business, non-studio users into trying the tool marketplace) requests a real-world check or task.

- **Match** — the temporary verified designer is generated and sets up the job. Each helper finishes the next — verified helper learn, trust, data compounds, growth surfaces monetize the same network.
- **Verify** — helper completes the task with GPS-locked photo, video, and structured checklist.

Two Stripe rails wired today: one-time credit packs *and* recurring monthly tiers.

- **Settle** — Stripe Connect pays the helper instantly, GUBER takes its cut, requester gets evidence on file.

Credit packs (one-time)

Spark · \$5 / 330 cr
 Pulse · \$10 / 700 cr
 Charge · \$45 / 18,000 cr
 Power · \$50 / 3,300 cr
 Surge · \$100 / 8,000 cr
 Whale · \$200 / 16,000 cr

Monthly tiers

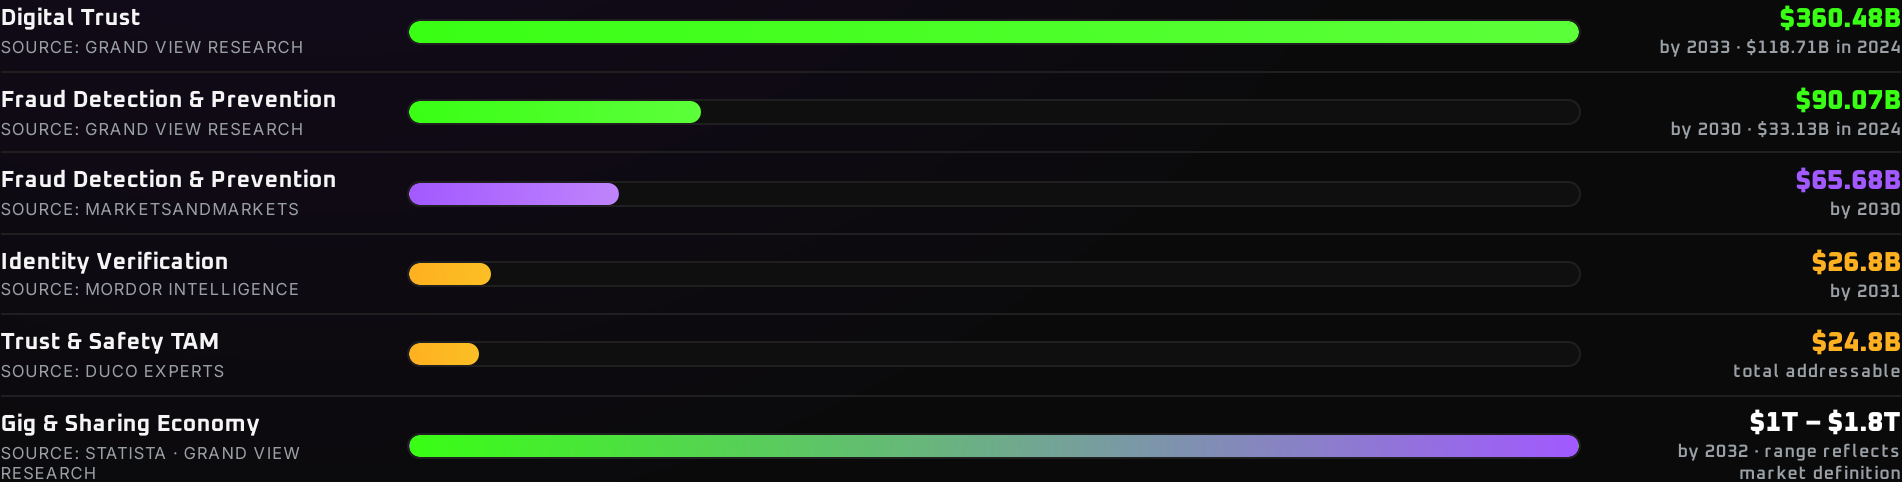

Standard · \$10.99 / mo
 Business · \$37.99 / mo
 Enterprise · \$97 / mo
 + Day-1 OG: +20 cr / no rollover
 + Free 2-credit trial on every signup
 All charges via Stripe today

Marketplace prints transaction revenue. Studio prints high-margin digital revenue from the same audience — zero extra acquisition cost. Software-margin economics layered on top of marketplace-volume economics.

Every verified job adds to the helper's portable resume **and** to GUBER's proprietary real-world data layer — both compound over time.

Market indicators.

GUBER sits at the intersection of large, named markets — all growing, all undergoing structural change, all citable to third-party research.

COMMUNITY ACTIVATION
Market projections are third-party estimates and do not represent guaranteed company performance.

The next-generation
How GUBER makes
real-world advertising
money

Human network, not a key word, and OEMs all need real-world proof.

Five revenue categories. Fourteen wired streams. All running on Stripe today.

Cash Drops are **sponsor-funded local activations** — measurable foot traffic, verified participation, and organic social reach delivered by a verified-human network no digital ad platform can replicate.

4

Fees · processing · cashouts

Sponsor-funded activation

Brands fund the drop. GUBER places it in the target zip. Verified users participate in person — generating measurable foot traffic into a physical location.

Worker cashout — instant	Helper	5%	Flag-gated
Trust Box subscription	End user	\$4.99 / mo	Live
Day-1 OG tier	Helper / supporter	One-time	Live
Business verification	Business	\$49 one-time	Live
Business Scout Plan	Business	\$99 / mo	Live
Extra unlock packs	Business	Per-pack	Live

STREAM	WHO PAYS	PRICE	STATUS
Marketplace boost (7-day featured)	Seller	Per-listing	Live
Cash Drop sponsorships	Brand sponsor	Sponsor + platform share	Live
Observation marketplace	Business buyer (helper gets 80%)	20% platform fee	Live
Direct Offers (Stripe Connect)	Hirer (gross-up math)	Application fee	Live
Sponsored visibility / content licensing	Brand sponsor	Per-impression / pack	Emerging

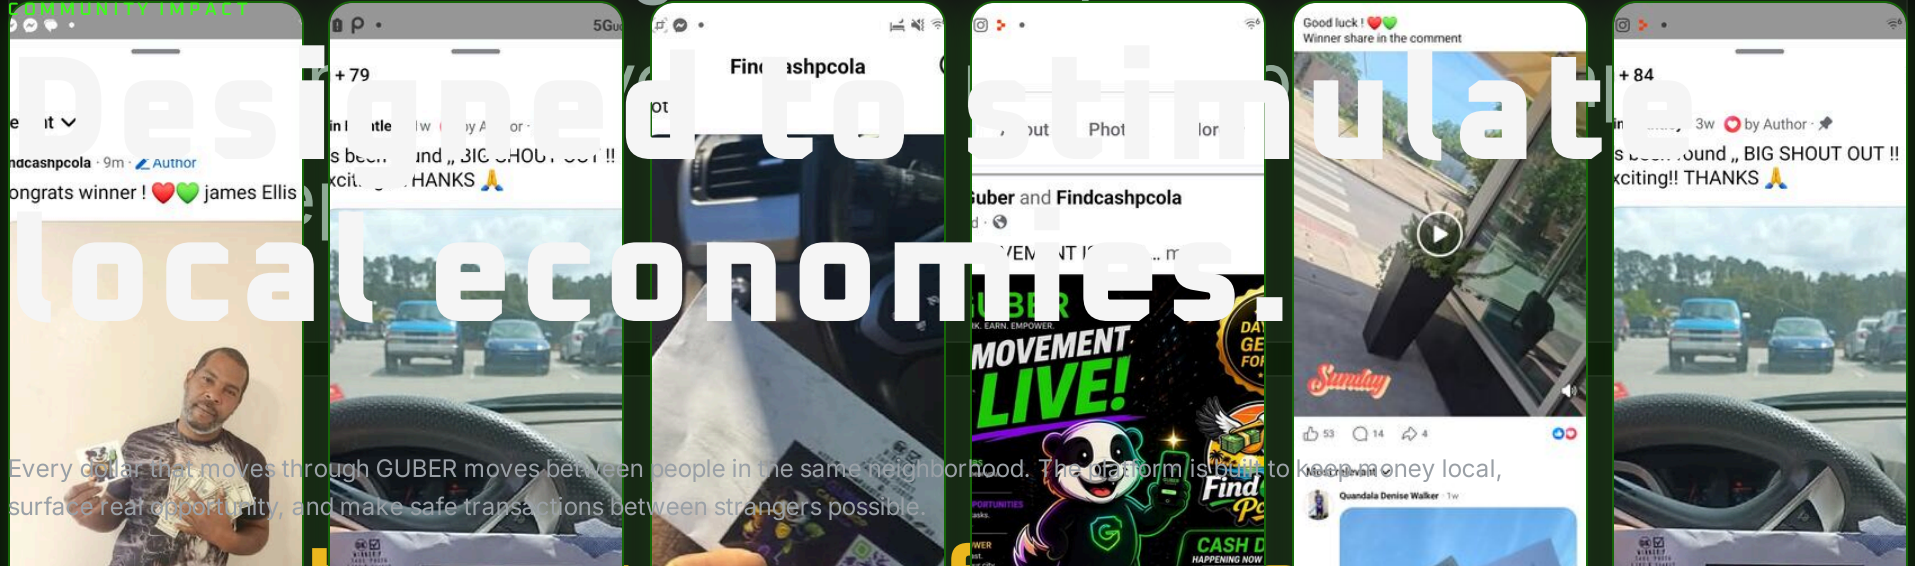

Real winners. Real posts. Real proof.

Verified participation · location-stamped

A sample of GUBER Cash Drop winners who publicly posted their wins to Facebook. **Brand-sponsored, real cash, organic social reach** — all in market today

attendance · organic social posts from real

COMMUNITY IMPACT

Every dollar that moves through GUBER moves between people in the same neighborhood. The platform is built to keep money local, surface real opportunity, and make safe transactions between strangers possible.

For everyday people

- Find work in your own city — no commute, no recruiter

- Earn fast income from real tasks, paid through Stripe
- Help neighbors and build a portable reputation doing it
- Complete real-world tasks for real people — verified on both sides

PRODUCT · RECURRING TRUST REVENUE

AI or Not — the trust

- Remaining ~60% is gross platform margin.
- Each drop is also a free user-acquisition event —

A standalone trust product live at /ai-or-not. As AI-generated profiles, listings, and reviews flood every other marketplace, "verified human" becomes a feature people pay for

every winner posts proof, every player

What it does

What's already real.

- AI-image detection — paste or upload an image, get an AI-or-real verdict in seconds.

...

Live product

- Shipped on web and Google Play. Active production deployment. iOS App Store launch in progress.
- Same engine powers the internal

Stripe Connect infrastructure

Marketplace payment rails wired end-to-end — escrow, payout, ledger, webhooks, dispute flow.

DEFENSIBILITY

Why we win.

No incumbent collects all four primitives — verified identity, on-platform money, structured proof of work, and an open category set — under one roof. GUBER does.

	CRAIGSLIST · FB GROUPS	TASKRABBIT · HANDY	UBER · DOORDASH	GUBER
Verified identity (both sides)	—	Workers only	Workers only	✓ Both
Money on-platform	—	✓	✓	✓
Structured proof of work	—	—	Receipt only	✓ GPS + photo + checklist
Open category set	✓ but unsafe	Limited	Single vertical	✓ Open + verified
B2B side (talent + data)	—	—	—	✓ Scout Plan + Observations
Brand-sponsored gamification	—	—	—	✓ Cash Drops

Defensibility is the **verified-identity + proof-of-work data** we accumulate per user — **none of which the incumbents collect**.

**Use of funds — \$1M
over 18 months.**

Capital deployed against the highest-leverage investments for a live product entering its growth phase.

GPS verification logic

Location-stamp verification logic spanning across every job, tamper-resistant design.

\$1M
Valuation framework.
Verification system

\$15M
End-to-end product live in production —
vehicles, platform, marketplace.

EARLY-STAGE VALUATION FRAMEWORK

GUBER is seeking a **\$15M valuation framework** based on its live product, early infrastructure, trust-based platform model, and position within large growing markets connected to **work, verification, fraud prevention, and digital trust.**

AI or Not trust feature

Product Development & Engineering	30%	\$300K
Marketing, Growth & Community Activation	25%	\$250K
Operations, Compliance & Trust / Safety	15%	\$150K
Business Development & Partnerships	10%	\$100K
Customer Support, Moderation & QC	10%	\$100K
Infrastructure, Cloud & Platform Scaling	5%	\$50K
Working Capital & Contingency	5%	\$50K

Delaware LLC

Properly formed legal entity. Structured for institutional investment.

LONG-TERM VISION

America's Economic Super App.

D-U-N-S Number

Powered by **trust**, **verification**, and **opportunity infrastructure** — a single nationwide system where reputation, proof, and earning move together.

Registered with Dun & Bradstreet. Eligible for

Income

- The productivity engine — work, V&I, observations, portable resume. Real earnings in real communities.

- in Active business banking relationship. Clean

Commerce & Community

- Verified marketplace, sponsored activations, and local businesses funded by their own neighborhoods.

- social media footprint driving organic discovery. the gig economy.

FOUNDER

Built from lived experience, not theory.

Dimetris Bowden

Founder & CEO · GUBER Global LLC

Solo-built · ~18 months

GUBER was built **solo over roughly 18 months** — product, full-stack engineering, payments, native mobile, admin tooling, brand. Self-taught. Every surface in this deck is **shipped code in production today**, not slideware.

Designed by someone who lived the problem firsthand — and built the system they wished existed. Real-world execution, not theory.

Today the platform is grown **conservatively and organically** — only accepting volume a one-person operation can deliver on. That discipline protects the brand. This raise removes the ceiling: **real infrastructure, a real team, and the sales motion** to turn a verified user base into a self-sustaining nationwide trust network.
