

THE OPPORTUNITY

Hundreds of billions of dollars of local micro-services move through Craigslist, Facebook groups, and cash every year — with zero infrastructure for trust, payment, or proof. GUBER is the trust layer: **verified identity on both sides**, **money on-platform via Stripe Connect**, and **structured proof of work with GPS-locked photos and checklists**. Live on web and Google Play; iOS App Store submission in progress.

WHAT'S ALREADY SHIPPED

- 50+ user-facing pages on web + Capacitor Android app (iOS in submission)
- 50+ database tables: jobs, payments, money ledger, disputes, businesses, sponsors, observations
- Stripe Connect: subscriptions, one-time purchases, Connect payouts with split webhooks
- Cloudinary + Cloudflare R2 integrated for media storage at scale
- Google Sign-in live; Sign in with Apple + Apple Pay in process
- Push notifications: VAPID web-push + APNs direct delivery
- Admin panel, dispute resolution, soft-delete + retention

MULTIPLE LIVE REVENUE STREAMS

- Job platform fee 20% + 3.2% processing
- Trust Box subscription \$4.99/mo
- Day-1 OG one-time tier (\$1.99) — Stripe-live today
- Business verification \$49 + Scout Plan \$99/mo + add-on unlocks
- Cash Drop brand sponsorships (~60% gross margin)
- GUBER Studio: 6 credit packs (\$5-\$200) + 3 tiers (\$10.99 / \$37.99 / \$99 mo)
- Marketplace boosts · Observation marketplace (20% take) · Direct Offers

LOW IDLE INFRASTRUCTURE COST

Lean infrastructure built to scale. Re-architected from roughly **\$50/day** infrastructure cost to **near-zero idle cost** through serverless autoscaling. Costs scale with usage and revenue, not calendar time.

DEFENSIBILITY

Verified-identity + proof-of-work dataset that compounds per user. None of the incumbents (Craigslist, TaskRabbit, Uber) collect this. Combined B2B side (Scout Plan + Observations) gives a second revenue engine no peer-to-peer competitor has.

NETWORK EFFECT

Every new verified helper makes the marketplace more useful for posters, more attractive to businesses, and more valuable to data buyers. Cash Drops are sponsor-funded acquisition events.

GUBER CONTENT STUDIO · SECOND REVENUE RAIL (LIVE IN PRODUCTION)

An AI media engine baked into every account. Cinematic motion clips from a single photo (Kling), short-form mirror-motion videos (Wan, 5s & 10s), business commercials, and brand music (MiniMax) — all generated in-app. Two Stripe rails wired today: **six one-time credit packs** (\$5 Spark → \$200 Whale = 16,000 cr) and **three monthly tiers** (Standard \$10.99 / Business \$37.99 / Enterprise \$99). Free 2-credit trial on every signup; Day-1 OG members get +20 cr/mo rollover. Sessions purge automatically so storage stays flat as usage scales. **Marketplace prints transaction revenue; Studio prints high-margin digital revenue from the same audience — zero extra acquisition cost.**

CASH DROPS · SPONSOR-FUNDED GROWTH ENGINE

Brands sponsor geo-targeted Cash Drop rewards. GUBER builds the drop, runs the gamification, and pays the winners. **~40% to winner cash + costs, ~60% gross platform margin**. 27 drops already live with public Facebook winners. **Migration plan:** moving all sponsor billing onto Stripe in the next release so every sponsor dollar flows through the same money ledger — clean invoicing, full audit trail.

AI OR NOT · TRUST BOX SUBSCRIPTION

A standalone trust product live at **/ai-or-not**. Detects AI-generated images and runs unlimited text verification — exposed as a paid badge on a user's GUBER profile so anyone they're transacting with can instantly see they're a verified human. **\$4.99/mo recurring subscription**, billed via Stripe on web and through the in-app ExternalPurchaseSheet on iOS (Apple-compliant U.S. flow). Same engine also powers GUBER's internal moderation pipeline, so every dollar of subscription revenue rides on infrastructure the marketplace already needs. **Why it matters:** as AI-generated profiles, listings, and reviews flood every other marketplace, "verified human" becomes a feature people pay for — recurring digital revenue with software-margin economics.

LONG-TERM VISION · THE ECONOMIC SUPER APP

Today's product is the on-ramp. The ecosystem maps to four pillars: **Income** (jobs, drones, Inspect & Verify, GUBER Resumes), **Business** (Studio with drone B-roll → AI commercials, Cash Drops as a physical ad network), **Community** (marketplace + barter + AI-or-Not + People's Champ Car Show), and **Infrastructure** (Lawyer App, GUBER Health, Public Housing Initiative — eligibility tied to GUBER income & reputation). Value flow matures across three phases: **USD (live today) → Barter (flag-gated) → GUBER Wallet Token (future, regulation-gated)**. Tying drone B-roll to AI commercials, and marketplace trust to housing eligibility, creates an economic moat no peer-to-peer competitor can copy. **A user doesn't just "use" GUBER — they operate within it.**

TRACTION (REAL, NO INFLATION)

- Verified non-sex-offender users: **310+** · 100% organic

THE ASK

Raising **\$150,000 – \$300,000** via **SAFE equity financing** to scale GUBER nationwide through **team**
